Uses & Features:

Country Club MD 12-24-8, the premier homogeneous, greens grade fertilizer, utilizes Meth-Ex[®] high-activity nitrogen that delivers excellent color response and maximum long-term feeding. Country Club MD 12-24-8 contains sea plant kelp meal and humic acid, both of which assist the turf plant in achieving its performance potential and aids in regeneration of healthy soils. Turf treated with sea plant kelp meal and humic acid will outperform untreated turf in overall quality and playability during stressful conditions.
