

Country Club[®] MD

Maximum Dispersion

The Next Stage in the Evolution of Golf Course Fertilizers

Country Club MD is an innovative fertilizer from LebanonTurf purposely formulated to produce a highly dispersible homogeneous particle that delivers superior turf quality and golf course playability through optimum nutrients and stress-buffering biostimulants in a single application. Turf treated with sea plant kelp meal and humic acid will outperform untreated turf in overall quality and playability during stressful conditions. Country Club MD products supply everything your turf needs to stay healthy all season long.
